Annual Report 2007 (separate volume)
This volume is available from the Office of Marketing and Communications (contact details back cover) or online www.uq.edu.au/about/annualreport.

Cover image: Dr Clare Underwood and Dr Tim Silk, researchers in the $62.5 million Queensland Brain Institute, which opened at UQ St Lucia in November.
Foreword

The financial statements are general purpose financial reports prepared in accordance with prescribed requirements.

The financial statements comprise the following components:
• Income Statement;
• Balance Sheet;
• Statement of Changes in Equity;
• Cash Flow Statement;
• Notes to the Financial Statements.

Within the above components, the financial statements have been aggregated into the following disclosures:
a) University (as an entity in its own right and to which the remainder of this Annual Report refers) – column headed “Parent”; and
b) Group (University and controlled entities: refer to note 40 for a listing of these entities) – column headed “Consolidated”.

Note 1 Summary of significant accounting policies

The principal accounting policies adopted in the preparation of the financial report are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated. The financial report includes separate financial statements for The University of Queensland as an individual entity and the consolidated entity consisting of The University of Queensland and its controlled entities.

(a) Basis of preparation
These financial statements are a general purpose financial report and have been prepared in accordance with the Financial Management Standard, issued under Section 46L of the Financial Administration and Audit Act 1977, applicable Australian equivalents to International Financial Reporting Standards, Urgent Issues Group Interpretations, other authoritative pronouncements of the Australian Accounting Standards Board and the Financial Statement Guidelines for Australian Higher Education Providers for the 2007 Reporting Period, issued by the Department of Education, Employment and Workplace Relations (DEEWR).

Statement of compliance
The financial statements of The University of Queensland, and notes thereto, comply with Australian Accounting Standards, some of which contain requirements specific to not-for-profit entities that are inconsistent with International Financial Reporting Standards requirements (IFRS).

Reporting format
In accordance with the Financial Management Standard, the University prepares an Income statement, a Balance sheet, a Statement of changes in equity and a Cash flow statement. The format of these statements is consistent with the Financial Statement Guidelines for Australian Higher Education Providers (HEPs) for the 2007 Reporting Period, issued by DEEWR.

Historical cost convention
The financial report has been prepared under the historical cost convention, except for available-for-sale financial investments, derivative financial instruments, certain classes of property, plant and equipment and investment property, which have been measured at fair value.

Rounding and comparatives
Amounts in the financial report have been rounded off to the nearest thousand dollars or, in certain cases, the nearest dollar.

Comparative information has been restated where necessary to be consistent with disclosures in the current reporting period.

Accrual basis of accounting
The financial statements, except for cash flow information, have been prepared using the accrual basis of accounting.

Critical accounting estimates
The University has made no judgements or assessments that may cause a material adjustment to the carrying amounts of assets and liabilities within the next reporting period.

(b) Basis of consolidation
The consolidated financial statements comprise the financial statements of The University of Queensland and its subsidiaries as at 31 December each year (the Group).

The financial statements of subsidiaries are prepared for the same reporting period as the parent entity, using consistent accounting policies. Adjustments are made to bring into line any dissimilar accounting policies that may exist.

All material inter-company balances and transactions between entities in the economic entity, including any unrealised profits or losses, have been eliminated on consolidation.

Where subsidiaries have entered or left the economic entity during the year, their operating results have been included/excluded from the date control was obtained or until the date control ceased.

(c) Foreign currency translation
Items included in the financial statements of the Group’s entities are measured using the currency of the primary economic environment in which the entity operates (the functional currency). The consolidated financial statements are presented in Australian dollars, which is The University of Queensland’s functional and presentation currency.

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the income statement.

(d) Revenue
Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Group and the revenue can be reliably measured. The following specific recognition criteria must be met before revenue is recognised:

(i) Student fees
Student fees are recognised as debtors following the census date for each session with the net value, full value of student fees less any fee waivers or discounts, recognised as revenue.

(ii) Sale of goods
Revenue is recognised when the significant risks and rewards of ownership of the goods have passed to the buyer and can be measured reliably. Risks and rewards are considered to have passed to the buyer at the time of delivery of the goods to the customer.

(iii) Rendering of services
Revenue from rendering a service is recognised only when the entity has a right to be compensated, it is probable that compensation will be received, and the amount of revenue and the stage of completion of a transaction can be reliably measured.

(iv) Interest
Interest revenue is recognised on a proportional basis taking into account the interest rates applicable to the financial assets.

(v) Contributions
Grants, contributions, donations and gifts that are non-reciprocal in nature are recognised as revenue in the year in which the group obtains control over them. Where grants are received that are reciprocal in nature, revenue is accrued over the term of the funding arrangements.

Contributed assets are recognised at their fair value. Contributions of services are recognised only when a fair value can be determined reliably and the services would be purchased if they had not been donated.

(e) Income tax
The University is exempt from paying income tax in Australia.

During the year, the ability to access an exemption from income tax has been withdrawn from IMBcom Pty Ltd, UniQuest Pty Ltd, CITR Pty Ltd and JKTech Pty Ltd as of 1 January 2007. With the exception of the UQ Investment Trust and the UQ Foundation Trust, all controlled entities of the University are now taxable entities with the charge for income tax expense based on profit for the year adjusted for any non-assessable or disallowed items. Where income tax is incurred, it is expensed and provided for in the financial period in which the tax is incurred.

CITR Inc, a subsidiary of CITP Pty Ltd, is subject to tax under the United States of America tax legislation. There is no liability for the year ended 31 December 2007 as this company had not generated a net taxable income.

Current tax assets and liabilities for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities based on the current period’s taxable income. The tax rates and tax laws used to compute the amount
Deferred tax assets and deferred tax liabilities not in profit or loss.

Revenue, expenses and assets are recognised net of the amount of goods and services tax (GST) except where the GST incurred on a purchase of goods and services is not recoverable from the taxation authority, in which case the GST is recognised as part of the cost of acquisition of the asset or as part of the expense item as applicable. Receivables and payables are stated with the amount of GST included.

The net amount of GST recoverable from, or payable to, the taxation authority is included as part of receivables or payables in the balance sheet.

Cash flows are included in the Cash flow statement on a gross basis and the GST component of cash flows arising from investing and financing activities, which is recoverable from, or payable to, the taxation authority are classified as operating cash flows.

Commitments and contingencies are disclosed net of the amount of GST recoverable from, or payable to, the taxation authority.

Impairment of assets

All non-current physical and intangible assets are assessed for indicators of impairment on an annual basis. If an indicator of possible impairment exists, the asset's recoverable amount is determined. Any amount by which the asset's carrying amount exceeds the recoverable amount is recorded as an impairment loss.

The asset's recoverable amount is determined as the higher of the asset's fair value less costs to sell and depreciated replacement cost.

An impairment loss is recognised immediately in the income statement, unless the asset is carried at a revalued amount. When the asset is measured at a revalued amount, the impairment loss is offset against the asset revaluation reserve of the relevant class to the extent available.

Cash and cash equivalents

Cash and short-term deposits in the Balance sheet comprise cash at bank and in hand and short-term deposits with an original maturity of 90 days or less.

For the purposes of the Cash flow statement, cash includes cash on hand, at call deposits with banks or financial institutions and investments in money market instruments maturing within less than 90 days and net of bank overdrafts.

(i) Trade receivables

Trade receivables are recognised at fair value, less provision for impairment. Trade receivables are due for settlement no more than 30 days from the date of recognition.

Collectability of trade receivables is reviewed on an ongoing basis. All bad debts are written off in the year in which they are recognised and are charged against the operating result. A provision for impairment is established when there is objective evidence that the Group will not be able to collect all amounts due according to the original terms of receivables. The balances of these provisions are set out in Note 20.

(j) Inventories

(i) Stock

Inventories are stated at the lower of cost and current replacement cost using the first-in-first-out or weighted average cost formula. Direct costs and an appropriate proportion of variable and fixed overhead expenses are included, where applicable. Those stores held by the University are essentially for internal use. Livestock is held for teaching and research purposes and is carried at market value.

(ii) Land held for resale

Land held for resale is stated at the lower of cost or net realisable value. Costs include the costs of acquisition and capitalised borrowing costs. Refer note 21.

(k) Financial Instruments

Investments and other financial assets

Financial instruments are initially measured at cost on trade date, which includes transaction costs, when the related contractual rights or obligations exist. Subsequent to initial recognition these instruments are measured as set out below.

The Group classifies its investments in the following categories: financial assets at fair value through profit or loss, loans and receivables, held-to-maturity investments and available-for-sale financial assets. The classification depends on the purpose for which the investments were acquired. Management determines the classification of its investments at initial recognition and re-evaluates this designation at each reporting date.

Financial assets at fair value through profit and loss

A financial asset is classified in this category if acquired principally for the purpose of selling in the short term or if so designated by management and within the requirements of AASB 139: Recognition and Measurement of Financial Instruments.

Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market and are stated at amortised cost using
the effective interest rate method. Loans to related companies do not bear interest and are held at original value unless they are assessed as being impaired.

**Hand-to-maturity investments**
These investments have fixed maturities, and it is the Group’s intention to hold these investments to maturity. Any held-to-maturity investments held by the Group are stated at amortised cost using the effective interest rate method. Cost is used to value held-to-maturity investment when it is not materially different to amortised cost.

**Available-for-sale financial assets**
Available-for-sale financial assets include any financial assets not included in the above categories. Available-for-sale financial assets are reflected at fair value. Unrealised gains and losses arising from changes in fair value are taken directly to equity.

**Fair value**
Fair value is determined based on current bid prices for all quoted investments. Valuation techniques are applied to determine the fair value for all unlisted securities, including recent arm’s length transactions, reference to similar instruments and option pricing models.

Under AASB 139 Financial Instruments: Recognition and Measurement, investments in equity instruments that do not have a quoted market price in an active market and whose fair value cannot be reliably measured shall be measured at cost. Where the shares of entities are not publicly traded, the value of the investment in those entities has been measured at cost.

**Investment in subsidiaries**
The University records in the parent’s separate financial statements all its investments in subsidiaries, jointly controlled entities and associates in accordance with AASB 139 Financial Instruments: Recognition and Measurement, that is, at cost less any allowance for impairment.

**Impairment of financial assets**
At each reporting date, the Group assesses whether there is objective evidence that a financial instrument has been impaired. If there is objective evidence to demonstrate that an asset has been impaired, an impairment amount is calculated and recognised in the financial statements.

**De-recognition of financial instruments**
The de-recognition of a financial instrument takes place when the Group no longer controls the contractual rights that comprise the financial instrument, which is normally the case when the instrument is sold or all cash flows attributable to the instrument are passed through to an independent third party.

(I) Property, plant and equipment

**Land**
Property, plant and equipment, including the museum collections, are measured at fair value less any subsequent accumulated depreciation and subsequent accumulated impairment losses.

In 2007, in accordance with Queensland Treasury Policy, the accounting treatment for the Library Collection changed and the collection was split into three categories:

- **Common Use Collection**
- **Reference Collection**
- **Heritage Collection**

The Common Use Collection, comprising textbooks and other multi-copy volumes, has been de-capitalised and further additions will be expensed.

The Reference Collection, comprising print monographs, print subscriptions and theses will continue to be capitalised. Print monographs and print subscriptions are valued at average replacement cost, based on the average cost of purchases over a five-year rolling period less accumulated depreciation and any impairment in value.

Theses are valued at the cost of reproducing the document from an electronic source less accumulated depreciation and any impairment in value.

The Heritage Collection, formally known as the Library Collection’s rare materials and manuscripts, will continue to be measured at fair value.

All other non-current assets are measured at cost less any accumulated depreciation and any impairment in value.

**Land**
Land was independently valued in 2007 by Australia Pacific Valuers Pty Ltd at current market value.

**Buildings**
Buildings were independently valued in 2007 by Australia Pacific Valuers Pty Ltd at current market value where a depth in market can be identified or as replacement cost where no depth in market can be established. For land improvements, the asset recognition threshold is $10,000.

**Heritage assets**
Heritage assets that provide operational service to the University are reported as part of the generic asset class to which they belong and are recognised on the basis applying to assets that have the same functionality.

**Revaluations of property, plant and equipment**
Non-current physical assets measured at fair value are comprehensively revalued at least once every five years with interim valuations, using appropriate indices, being performed on an annual basis where the change would be material to that class of asset.

On revaluation, accumulated depreciation is restated proportionately with the change in the gross carrying amount of the asset so that the carrying amount of the asset after revaluation equals its revalued amount.

Any revaluation surplus is credited to a revaluation reserve included in the equity section of the Balance sheet unless it reverses a revaluation decrease of the same class of asset previously recognised in the income statement.

Any revaluation deficit is recognised in the Income statement unless it directly offsets a previous surplus from the same class of asset in the revaluation reserve.

The asset recognition threshold for rare materials and manuscripts is $1.

**Reference Collection**
The University’s collection of print monographs, print subscriptions and publications, is recorded at average replacement cost, based on the average cost of purchases over a five-year rolling period.

Theses in this collection are recorded at the cost of reproducing the document from an electronic source.

The asset recognition threshold is $1.

**Museums & other collections (including works of art)**
The University Anthropology, Antiquities and Art Museum collections have been valued at management valuation in 2007.

The asset recognition threshold is $1.

**Infrastructure assets**
Infrastructure assets were independently valued in 2007 by Australia Pacific Valuers Pty Ltd at current market value where a depth in market can be identified or as replacement cost where no depth in market can be established. For land improvements, the asset recognition threshold is $10,000.

**Library collections**

**Heritage Collection**
The University’s collection of rare materials and manuscripts is considered to be a heritage collection. Management considers that the collection does not lose any value over time.
Derecognition of property, plant and equipment

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset.

Gains and losses on disposals are determined by comparing proceeds with the carrying amount. These gains or losses are included in the Income statement. When revalued assets are sold, amounts included in the revaluation reserve relating to that asset are transferred to retained surplus.

Depreciation

Buildings, computing equipment, other plant and equipment, infrastructure assets, land improvements and library collections are depreciated over their estimated economic useful lives using either the straight line or diminishing value method. All other items of property, plant and equipment, including land, works under construction rare materials and manuscripts, museums and other collections, are not depreciated. Leasehold improvements are depreciated over the unexpired period of the lease.

In 2007, the accounting treatment regarding the depreciation of motor vehicles was reassessed and will now be depreciated over their estimated useful lives using the straight line method.

The depreciation rates used are:

- **Buildings**: 1%–7% straight line
- **Motor vehicles**: 15% straight line
- **Computing equipment**: 20.0% straight line
- **Other plant and equipment**: 10.0% straight line
- **Infrastructure assets**: 1%–5% straight line
- **Land improvements**: 1%–10% straight line
- **Library Reference Collection**: 2.0% diminishing value

The assets’ useful lives are reviewed and adjusted if appropriate at each financial year end.

(m) Intangible assets

Expenditure during the research phase is recognised in the income statement as an expense when it is incurred.

Development expenditure is capitalised only when technical feasibility studies identify that the project will deliver future economic benefits and these benefits can be measured reliably. Capitalised development expenditure is stated at cost less accumulated amortisation. Amortisation is calculated using the straight-line method to allocate the cost over the period of the expected benefit which, in the case of system development costs, is eight years. For intangibles, the asset recognition threshold is $100,000.

(n) Trade payables

Trade creditors are recognised on receipt of the goods or services ordered and are measured at the agreed purchase/contract price, gross of all applicable trade and other discounts. Amounts owing are unsecured and are generally settled on 30-day terms.

(o) Borrowings

Borrowings are initially recognised at fair value, net of transaction costs incurred. Borrowings are subsequently measured at amortised cost. Any difference between the proceeds (net of transaction costs) and the redemption amount is recognised in the Income statement over the period of the borrowings using the effective interest method.

Borrowings are classified as current liabilities unless the Group has an unconditional right to defer settlement of the liability for at least 12 months after the balance sheet date.

Borrowing costs

Borrowing costs are recognised as an expense when incurred.

(p) Provisions

Provisions are recognised when the Group has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

(q) Employee benefits

Employee entitlements

Liabilities for employee entitlements that are expected to be paid or settled within 12 months of balance date are accrued at nominal amounts calculated on the basis of current salary rates. Liabilities for employee entitlements that are not expected to be paid or settled within that period are accrued at the present value of expected future payments. Present values are calculated using the rate applicable to government guaranteed securities with similar maturity terms and estimated future salary increases.

(r) Superannuation

The UniSuper Defined Benefit Division (DBD) is a multi-employer defined benefit plan under superannuation law but, as a result of amendments to Clause 34 of UniSuper, a defined contribution plan under AASB 119 Employee Benefits.

Clause 34 of the Unisuper Trust Deed outlines the process UniSuper must undertake (including employer notifications and notice periods) to request additional contributions from employers if the UniSuper assets are considered by the Trustee to be insufficient to provide benefits payable under the deed. Previously at least four years’ notice that such a request may be made was required. If such a request was agreed to by employers then members were also required to contribute additional contributions equal to one half of the rate at which their employer was prepared to contribute. If employers did not agree to increase contributions, the Trustee was to reduce benefits on a fair and equitable basis.

On 3 November 2006, an amendment to Clause 34 of the Unisuper Trust Deed was put to the Unisuper Consultative Committee and passed to become effective on 31 December 2006. In essence, it provided a clear understanding (subject to superannuation law) that if actuarial investigations determined there are insufficient funds to provide benefits payable under the deed, the Trustee must reduce the benefits payable under Division A and Division B on a fair and equitable basis.

Subsequently changes to Clause 34 have been made, taking effect from 1 January 2007, that remove the requirement for employers and members to be asked to “top up” their contributions if there is a prolonged shortfall in the Defined Benefit Division.

(s) Goodwill

Goodwill is an asset and is shown at original cost. It is not amortised but tested annually for impairment.

(t) Third party investments

Where a controlled entity receives shares and other securities in a company in return from licensing and transfer of technology to that company, the value of those shares is recognised as licence revenue. Consistent with University policy, two-thirds of the gross revenue is set aside for the benefit of the University and the inventors. One third of this represents a non-current liability for the Group.

(u) Change in accounting policy

In 2007, in accordance with Queensland Treasury Policy, the accounting treatment for the Library Collection changed and the collection was split into three categories:

- Common Use Collection
- Reference Collection
- Heritage Collection

The Common Use Collection, comprising textbooks and other multi-copy volumes, has been de-capitalised and further additions will be expensed. The net effect of this adjustment was a decrease in 2006 opening retained earnings of $33.4m.

The Reference Collection, comprising print monographs, print subscriptions and theses, will continue to be capitalised. Print monographs and print subscriptions are valued at average replacement cost, based...
on the average cost of purchases over a five-year rolling period less accumulated depreciation and any impairment in value. Theses are valued at the cost of reproducing the document from an electronic source less accumulated depreciation and any impairment in value. 2006 comparatives have not been restated, as reliable data is not available to enable a prior year valuation.

The Heritage Collection, formally known as the Library Collection’s rare materials and manuscripts, will continue to be measured at fair value.

(v) Correction of prior period error

In the 2006 Financial statements, the application of AASB 1004 – Contributions resulted in a restatement of the 2005 reported surplus and a reduction in income recognised in 2006 of $18.6 million. While the University interpreted the application of this standard in regards to certain research grants provided by the Commonwealth and classified them as reciprocal grants, further analysis and interpretation of the standard concludes that all Commonwealth Grants must be defined as non-reciprocal grants. The impact of the change in interpretation is an increase in the 2006 surplus of $12.9 million and an increase in the 2007 surplus of $16.7 million.

In the Financial statements for the years ended December 31, 2005, and December 31, 2006, various Smart State loans were recorded in other financial liabilities at a fair value of $20.954 million and $30.954 million respectively. Fair value was determined to be the consideration received by the University. Subsequent to initial measurement, these loans were recorded at the nominal value of future cash payments to be made on the loans, ignoring any forgiveness clauses set out in the relevant loan documents.

Management does not expect the full amount payable under the Smart State loan agreements to crystallise into obligations and therefore the fair value of the Smart State loans have been restated to management’s estimate of amounts that will be payable by the Group.

In accordance with AASB 139 Financial Instruments: Recognition and Measurement, the loans have been recognised at fair value. Fair value has been estimated to equal the Net Present Value (NPV) of expected future cash payments to be made, discounted by using the yield on a Treasury Fixed Coupon Bond maturing in 2021 (6.125%). The methodology applied assumes that all obligations under the loan agreements will be met.

The change in the method used to estimate the fair value of the financial liabilities has resulted in an increase to other revenues in 2006 of $12.362 million, an increase in finance costs of $241,000 and a reduction in non-current liabilities of $29.14 million.

In the financial statements for the year ended December 31, 2006, the University recorded as revenue (State and local government financial assistance) an amount of $5 million that should have correctly been recorded as an “other financial liability”. The amount was received under a loan agreement between the University and the State of Queensland and therefore cannot be recognised as revenue. The error had the effect of overstating retained surpluses by $5 million, both in the parent and consolidated entity.
NOTES TO THE FINANCIAL STATEMENTS FOR THE FINANCIAL YEAR ENDED DECEMBER 31, 2007

Note 2   Events occurring after the balance sheet date
No events have occurred after reporting date that would have a significant effect on the 2007 financial statements.

Finance costs in the parent entity relate exclusively to the amortisation of the Smart State loans. AASB139 requires the university to recognise the amortisation of the loans (being the difference each year between fair value at initial recognition and the fair value of the cash received) as finance costs.

(a) Reconciliation to cash at the end of the year

The above figures are reconciled to cash at the end of the financial year as shown in the Statement of cash flows as follows:

<table>
<thead>
<tr>
<th></th>
<th>Consolidated 2007 $'000</th>
<th>Parent 2006 $'000</th>

<td>204,017 111,280</td>
</tr>
</tbody>
</table>

(b) Cash at bank and on hand

Cash at bank and on hand earns interest at floating rates based on daily bank deposit rates.

(c) Cash held on behalf of third party

These Commonwealth funds are a contribution by the Commonwealth Government for the construction of facilities for the Translation Research Institute (TRI). The monies currently being held on behalf of the Commonwealth cannot be expended by the University. The funds have been quarantined from the University’s normal operating funds in a separate bank account. The University has no entitlement to interest on the funds invested. Once the TRI becomes a legal entity, the Commonwealth and the University will be required to sign a deed of variation and deed of novation, formally transferring funds to that entity.

(d) Deposits at call

Short term deposits are made for varying periods of between one day and three months, depending on the immediate cash requirements of the Group, and earn interest at the respective short-term deposit rates.

In 2001, the Queensland Government announced the establishment of the Smart State Research Facilities Fund (SSRFF) to promote development of research and infrastructure for science and technology in Queensland. To date, a total of $58,487,739 has been received from the SSRFF for seven projects, in the form of interest-free loans repayable over periods that vary from 30 to 35 years. Repayments on the loans do not start until 2015. Provided the University meets all its obligations under the various loan agreements, one third of each loan will be forgiven.

The University has a potential financial liability to repay the full amount of the loans, which will only result if certain conditions under the various loan agreements are not met. Management does not expect these potential financial liabilities to crystallise into obligations and therefore financial liabilities disclosed in the above table are management’s estimate of amounts that will be payable by the Group. No material losses are expected and, as such, the fair values disclosed are management’s estimate of amounts that will be payable by the Group.

In accordance with AASB 139 Financial Instruments: Recognition and Measurement, the loans have been recognised at fair value. Fair value has been estimated to equal the Net Present Value (NPV) of expected future cash payments to be made, discounted by using the yield on a Treasury Fixed Coupon Bond maturing in 2021 (6.125%). The methodology applied assumes that all obligations under the loan agreements will be met.

Restricted retained surplus comprises scholarships, bequests, specific research grants and other capital accumulations where the funds cannot be used for purposes other than those specified by the contributor.

(i) **Property, plant and equipment revaluation reserve**

This reserve records movements in the fair value of land, buildings, rare library materials and manuscripts, museum collections, infrastructure and land improvements.

(ii) **Available-for-sale investment revaluation reserve**

This reserve records movements in the fair value of available-for-sale financial assets.

 Note 39 Contingencies

Parent Entity

The University has several ongoing minor legal cases awaiting outcome. Estimates cannot be reliably measured for some of these cases, but the University believes the final amounts payable would be unlikely to exceed $200,000 in aggregate.

Supplementary benefit payments

The University has a contingent liability that may arise for supplementary pension payments to be made to some retired staff members or their dependants. The retired staff were members of a Staff Superannuation Scheme that was terminated in June 1984. Former members who had been granted supplementary benefits at this date continue to receive these benefits.

SARV Pty Ltd

During 1999, a controlled entity, SARV Pty Ltd (SARV), entered into an agreement with the Delfin Property Group to develop and market land held for resale. Under the terms of the agreement, SARV is entitled to retain a guaranteed return from the gross proceeds received, which are directly related to the land. The return will be received in half-yearly installments over the 10-year term of the project.

Legal and taxation advice has confirmed the possibility that SARV may have a future income tax liability.

It is expected that a voluntary disclosure will be made to the ATO during 2008 to mitigate the tax issue referred to above. The ultimate amount of any future tax liability resulting from the voluntary disclosure cannot be determined with an acceptable amount of reliability at this time.

The directors have made arrangements to manage and mitigate the possible future tax liability in the company including a letter of comfort that ensures the University of Queensland would meet any such liability should the company not be able to in its own capacity.

Unimutual

For the period 1 January 1990 to date, the University of Queensland has been a member of Unimutual, a mutual organisation that provides discretionary risk protection to universities and other educational and research institutions. Under its Rules, Unimutual may make a call for a supplementary contribution from members if there is a deficit in any year. A supplementary contribution would only be levied after the application of reinsurance recoveries and investment income for the appropriate year. Supplementary contributions may be levied pro rata according to the original contribution paid.

UniQuest Pty Ltd

In 2001, UniQuest Pty Ltd entered into an agreement with Coridon Pty Ltd wherein an unrelated third party purchased a licence for certain technology owned by UniQuest for the amount of $17,500,000. The amount has been paid to UniQuest and is currently held on deposit with Citibank. The deposit earns interest which is reinvested. It is expected that the total amount on deposit will increase to approximately $26,418,000 by 29 June 2008.

The unrelated third party has the right (a put option), at any time up till that date, to require Coridon to purchase shares in another company. Whether that third party exercises that right depends on a range of factors outside UniQuest’s control. If Coridon is unable to pay for the shares, UniQuest must pay on its behalf. The amount that must be paid is equivalent to the amount held by UniQuest in the term deposit with Citibank at the time the right is exercised.

The possible obligation for UniQuest to settle Coridon’s possible obligation is a contingent liability while the cash held on deposit is a contingent asset. Due to the inherent uncertainty of these transactions, no asset or liability has been taken up in the financial statements for those transactions.

JKTech Pty Ltd

In June 2007, the University of Queensland received a letter from Newmont Mining Services Pty Ltd regarding JKTech’s assignment of the JKMetAccount intellectual property to Mincom Ltd. The letter alleged breaches of a research agreement between the University of Queensland Julius Kruttschnitt Mineral Research Centre and Newmont and a software licence agreement between JKTech Pty Ltd and Newmont.

Newmont has requested compensation of $500,000. The software licence agreement, to which JKTech is a party, has a maximum liability for breach of the agreement of $250,000. No mediation has occurred as at 31 December 2007 and, as such, the matter remains unresolved.

UIIT contingency

The University has entered into a funding deed with the Universities Innovation and Investment Trust No.1 (UIIT). Under the deed, the University may be required to meet calls on partly paid units held in UIIT.

As at 31 December 2007, the University held 17,999,999 partly paid $1 units paid up to $9,250,000, and may be required to meet calls totalling $8,750,000.

The rate of drawdowns depends on:
1. Rate of investment in new ventures;
2. Rate of liquidation of investments; and
3. If unit holders request that the funds from any liquidated investments be retained in the trust to be offset against future calls, or paid out to them immediately.

Currently $750,000 is payable within seven days of a call (on the original 9,999,999 units). The Trustee may also call on the University to pay up any unpaid amounts on some or all of the newly issued eight million partly paid $1 units in UIIT in tranches in accordance with the following schedule:

Tranche 1 – call date after 31 December 2007
Tranche 2 – call date after 31 December 2008
Tranche 3 – call date after 31 December 2009

No other contingencies of a significant nature exist or are recognised in the accounts.

Note 43 Financial risk management objectives and policies

Financial risk management
The Group’s activities expose it to a variety of financial risks: market risks, credit risk, and liquidity risk. Risk management is conducted by a central treasury section, adhering to policies approved by Senate. Senate provides written principles for overall risk management and written policies covering specific areas, such as cash management, investment of funds, borrowing funds and use of foreign exchange contracts.

The Group’s financial instruments consist mainly of deposits with banks and cash funds, equity instruments, accounts receivable and payable and loans with the State of Queensland.

(a) Market risk

(i) Interest rate risk
The Group’s exposure to market risk for changes in interest rates relates primarily to the Group’s short-term investments. The Group manages its short-term cash flow interest-rate risk by investing in a mixture of cash funds and fixed-term deposits.

(ii) Equity market risk
The Group is exposed to equity securities price risk because of long-term investments held by the Group. The Group manages its exposure to market risk by diversifying its long-term investments across different investment asset classes.

(iii) Foreign exchange risk
The Group operates internationally and is exposed to foreign exchange risk arising from various currency exposures, primarily the US dollar. To manage its foreign exchange risk arising from future commercial transactions, the Group has, at times, entered into foreign exchange contracts. It is Senate’s policy to not enter into forward exchange contracts until a commitment is in place. The forward currency contracts must be in the same currency as the hedged item.

1. Cash is currently at call, which is at a floating interest rate. UQ is liable to interest rate risk on the total cash balance (excluding monies held on behalf of a third party) and foreign exchange risk on USD account balances.
2. UQ is exposed to foreign exchange risk on debtors denominated in foreign currencies.
3. Currently one bank bill has been purchased and funds are being held in term deposits. Both instruments are at fixed interest rates and therefore not subject to interest rate risk.
4. Shares consist of unlisted shares and investments held at cost. Price movements in these investments cannot be measured reliably and have been omitted.
5. Price risk in relation to managed investment funds has been estimated as the approximate movement in realised and unrealised gains for the current year.
6. Other financial assets consist largely of unlisted shares and investments held at cost. Price movements in those investments cannot be measured reliably and have been omitted.
7. UQ has applied the projected movement in exchange rates to open forward contracts as at the balance date.
8. SARV commercial bill - exposure to interest rate risk is limited to the bank loan facility consisting of fixed rate, discounted commercial bills where interest rate risk arises from the potential for a change in market interest rates to affect the net fair value of the bills. Interest rate risk is managed by selling bills for relatively short terms, usually 90 days or less.
Fair value AASB 7.27
The methods for estimating fair value are outlined in the relevant notes to the financial statements.

(b) Credit risk
The maximum exposure to credit risk at balance date in relation to each class of recognised financial assets is the carrying amount of those assets, net of any provisions for impairment of those assets, as disclosed in the Balance Sheet and Notes to the financial statements.

The economic entity does not have any material credit risk exposure to any single receivable or group of receivables, under financial instruments entered into by the economic entity.

There is no significant concentration of credit risk within the Group.

(c) Liquidity risk
The Group’s objective is to maintain a balance between continuity of funding, flexibility through use of deposits with banks and cash funds, and accessibility to a drawdown stand-by facility.

(d) Categorisation of financial instruments
The group has categorised the financial assets and financial liabilities held as:

FINANCIAL ASSETS
Cash
- Cash and cash equivalents
Loans and receivables
- Receivables
Held-to-maturity investment
- Investments
Assets held as available-for-sale and at fair value through profit and loss
- Shares
Assets held at fair value through profit and loss
- Managed investment portfolio
- Forward exchange contracts

FINANCIAL LIABILITIES
Other liabilities
- Payables
- Interest-bearing liabilities
- Non interest-bearing liabilities

MANAGEMENT CERTIFICATE

We have prepared the foregoing annual financial statements pursuant to the provisions of the Financial Administration and Audit Act 1977 and other prescribed requirements and certify that —

(a) the financial statements and consolidated financial statements are in agreement with the accounts and records of The University of Queensland and its controlled entities;

(b) in our opinion:

(i) the prescribed requirements in respect of the establishment and keeping of accounts have been complied with in all material respects; and

(ii) the financial statements have been drawn up so as to present a true and fair view of the transactions of The University of Queensland and controlled entities for the period 1 January 2007 to 31 December 2007 and the financial position as at 31 December 2007 in accordance with prescribed accounting standards and conform with the Financial Statement Guidelines for Australian Higher Education Providers for the 2007 Reporting Period issued by the Australian Government Department of Education, Employment and Workplace Relations;

(iii) at the time of the certificate there are reasonable grounds to believe that the University will be able to pay its debts as and when they fall due;

(iv) the amount of Australian Government financial assistance expended during the year was for the purpose(s) for which it was intended; and

(v) the University has complied with applicable legislation, contracts agreements and programme guidelines in making that expenditure.

INDEPENDENT AUDITOR’S REPORT

To the Members of the Senate of The University of Queensland

Matters Relating to the Electronic Presentation of the Audited Financial Report

The audit report relates to the financial report of The University of Queensland for the financial year ended 31 December 2007 included on The University of Queensland’s website. The University is responsible for the integrity of The University of Queensland’s website. We have not been engaged to report on the integrity of The University of Queensland’s website. The audit report refers only to the statements named below. It does not provide an opinion on any other information which may have been hyperlinked to/fom these statements. If users of the financial report are concerned with the inherent risks arising from electronic data communications they are advised to refer to the hard copy of the audited financial report, available from The University of Queensland, to confirm the information included in the audited financial report presented on this website.

I have audited the accompanying financial report of The University of Queensland, which comprises the balance sheet as at 31 December 2007 and the income statement, statement of changes in equity and cash flow statement for the year ended on that date, a summary of significant accounting policies other explanatory notes and certificates given by the Chancellor, Vice-Chancellor and Chief Financial Officer of the consolidated entity comprising the University and the entities it controlled at the year’s end or from time to time during the financial year.

The University’s Responsibility for the Financial Report

The University is responsible for the preparation and fair presentation of the financial report in accordance with prescribed accounting requirements identified in the Financial Administration and Audit Act 1977 and the Financial Management Standard 1997 including compliance with applicable Australian Accounting Standards (including the Australian Accounting Interpretations). This responsibility includes establishing and maintaining internal controls relevant to the preparation and fair presentation of the financial report that is free from material misstatement, whether due to fraud or error; selecting and applying appropriate accounting policies; and making accounting estimates that are reasonable in the circumstances.

Auditor’s Responsibility

My responsibility is to express an opinion on the financial report based on the audit. The audit was conducted in accordance with Auditor-General of Queensland Auditing Standards, which incorporate the Australian Auditing Standards. These Auditing Standards require compliance with relevant ethical requirements relating to audit engagements and that the audit is planned and performed to obtain reasonable assurance whether the financial report is free from material misstatement.
An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial report. The procedures selected depend on the auditor’s judgement, including the assessment of risks of material misstatement in the financial report, whether due to fraud or error. In making those risk assessments, the auditor considers internal controls relevant to the entity’s preparation and fair presentation of the financial report in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity’s internal control, other than in expressing an opinion on compliance with prescribed requirements. An audit also includes evaluating the appropriateness of accounting policies and the reasonableness of accounting estimates made by the University, as well as evaluating the overall presentation of the financial report and any mandatory financial reporting requirements as approved by the Treasurer for application in Queensland.

I believe that the audit evidence obtained is sufficient and appropriate to provide a basis for my audit opinion.

Independence

The Financial Administration and Audit Act 1977 promotes the independence of the Auditor-General and QAO authorised auditors. The Auditor-General is the auditor of all Queensland public sector entities and can only be removed by Parliament.

The Auditor-General may conduct an audit in any way considered appropriate and is not subject to direction by any person about the way in which audit powers are to be exercised. The Auditor-General has for the purposes of conducting an audit, access to all documents and property and can report to Parliament matters which in the Auditor-General’s opinion are significant.

Auditor’s Opinion

In accordance with s.46G of the Financial Administration and Audit Act 1977 –

(a) I have received all the information and explanations which I have required; and

(b) in my opinion –

(i) the prescribed requirements in respect of the establishment and keeping of accounts have been complied with in all material respects; and

(ii) the financial report has been drawn up so as to present a true and fair view, in accordance with the prescribed accounting standards of the transactions of The University of Queensland and the consolidated entity for the financial year 1 January 2007 to 31 December 2007 and of the financial position as at the end of that year.
