

# UNIVERSITY MEDALLISTS

Seventy-two medals were awarded to graduates who completed degrees in 1998. University medals represent a thriving tradition of excellence in teaching and learning and are limited not by number but by standards. They go only to outstanding first-class honours graduates who achieve grade point averages of at least 6.4 (out of a possible 7), and this year standards were so high that the top five medallists achieved almost perfect scores ranging from 6.982 to 6.903.
