MESSAGE FROM THE CHANCELLOR

Since the Chancellor's Fund was established in 1991, thousands of alumni and friends have helped to enhance the lives of students and contribute to groundbreaking discoveries.

Gifts from these many supporters underpin excellence at the University. This partnership makes the Chancellor's Fund a powerful entity that can engender remarkable outcomes.

Thank you for your support. I am proud to invite you to join me in being a part of The University of Queensland's philanthropic community in this, the 20th year of the Chancellor's Fund.

John Story
Chancellor

"WHY I GIVE" STORIES FROM OUR DONORS

"I give annually to the Chancellor's Fund because I am so grateful for the opportunity to have studied at the University. It is a pleasure to be able to contribute to its ongoing success."

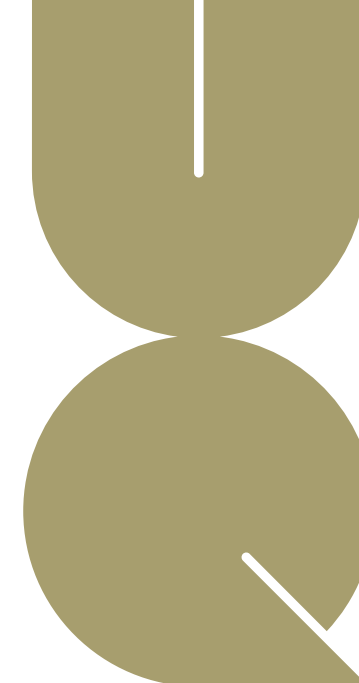

EDWARD PURNELL-WEBB BSc Law, 1966

"It is a wonderful feeling to help make a difference, albeit small - especially providing opportunities to disadvantaged students through scholarships."

LYN BLACK Bachelor of Arts, 1973 and UQ staff member

"When I think of my years at UQ, I remember feeling the world was full of potential and opportunity. I believe donating to the University ensures the next generation of students will get to experience that same feeling, and they will continue to make the world a better place because of the open-minded environment that feeling creates."

LACEY WHITE BSc Engineering, 2003

THE IMPACT OF YOUR SUPPORT IN 2010

Gifts made to the Chancellor's Fund last year supported a diverse range of activities across the University.

- Scholarship endowment
- Emerging needs
- Triple P (Positive Parenting Program)
- Research priorities
- Schools, faculties, institutes
- The UQ Library
- VC's Awards for Internationalisation
- Teaching excellence initiatives
- Other

THANK YOU FROM TRIPLE P

"Thank you to those who supported Triple P through the Chancellor's Fund Appeal last year. Your gifts will provide essential program resource material to parents who are participating in parenting trials in 2011. They will also provide funds for analysis of research that was conducted in 2010 including trials of Resilience Triple P to address bullying, and Stepping Stones Triple P for children with Autism Spectrum disorder.

Philanthropy such as yours is allowing us to move these essential projects forward and translate research into meaningful outcomes for families."

Professor Matt Sanders
Founder of Triple P (Positive Parenting Program)

Play a part in the success of one of these key programs or tell us which UQ endeavour inspires you.

Thank you

Inaugural Young Achievers Program residential camp, St Lucia campus, February 2010

UQ YOUNG ACHIEVERS PROGRAM

The UQ Young Achievers Program builds the tertiary aspirations of secondary school students who may not have considered going to university due to financial hardship, geographic isolation and other barriers.

In addition to valuable financial support, students benefit from on-campus residential experiences, assistance with study and career planning and mentoring by current UQ students.

UQ Young Achievers receive \$1000 annually to assist them through Years 11 and 12. Students who transition to UQ will receive an annual scholarship of \$6000, enabling them to thrive throughout their time at the University.

Your gift will provide essential additional support for students and help them to fulfil their educational ambitions.

AIDEN'S STORY

UQ Young Achiever Aiden Grewal has the opportunity to take his love for science to the next level.

With a keen interest in the structure of cells and atoms, Aiden has set his sights on a biomedical degree when he begins university in 2013.

"With a degree in biomedical science I hope to one day create medicines to help people around the world."

Your gift will enable talented young people like Aiden to realise their potential.

QBI CENTRE FOR AGEING DEMENTIA RESEARCH

The impact of dementia can be devastating for families. By 2050, the disease is predicted to affect almost 1 million people in Australia alone. So far, there is no known treatment.

Dementia encompasses a range of conditions characterised by the impairment of brain functions, including language, memory, perception and cognitive skills.

The Queensland Brain Institute's new Centre for Ageing Dementia Research offers a real opportunity to develop revolutionary new therapeutics to prevent and treat ageing dementia by regulating cell death and stimulating cellular regeneration within the adult brain.

Your gift is an investment in research that will help people suffering from dementia now and protect future generations.
