Exposure-prone Procedures Statement – Year 3 and 5

Information for Students

An exposure-prone procedure (EPP) is a procedure where there is a risk of injury to the Health Care Worker (HCW) resulting in exposure of the patient’s open tissues to the blood of the worker. These procedures include those where the worker’s hands (whether gloved or not) may be in contact with sharp instruments, needle tips or sharp tissues (spicules of bone or teeth) inside a patient’s open body cavity, wound or confined anatomical space where the hands or fingertips may not be completely visible at all times.

Blood borne infectious disease screening and fitness to perform exposure prone procedures

Healthcare workers must not perform exposure prone procedures if they are:

- HB e Antigen positive or HBV DNA positive (using an approved sensitive real time PCR assay)
- HCV RNA positive (by PCR or similar test)
- HIV antibody positive (even if virus levels become undetectable on appropriately monitored anti-retro-viral therapy)

References

- Australian National Guidelines for the Management of Health Care Workers known to be infected with blood-borne viruses. Australian Communicable Diseases Network 28 February 2012

Due to the increased risk of blood-borne pathogen transmission occurring during a dental procedure, the Dental Board of Australia stipulates that all dental practitioners must be aware of their infectious status for the blood-borne viruses Hepatitis B, Hepatitis C and HIV. School of Dentistry students are required to provide a statement from their doctor confirming their infectious status prior to enrolment and prior to clinical placements at commencement of Year 3 and year 5 of the program.

Screening Verification Details

Medical Practitioner Statement

I have screened this student for hepatitis B & C and HIV infection and either the student is not infected on testing, or an Australian registered Infectious Diseases physician, Gastroenterologist, Hepatologist or Occupational Medicine Physician has certified that further testing has confirmed that the student is able to safely perform EPP.

Doctor’s signature

Date

OR

The student cannot safely perform EPP as confirmed by Infectious Diseases physician, Gastroenterologist, Hepatologist or Occupational Medicine Physician.
