Hazard Alert

Recall of Boiling Water Heaters

The manufacturer of *Zip HydroTap* and *Zip Tea Tap* undersink instant water heaters has announced a product recall for units purchased between 1 July 1998 and 25 August 2000.

An electrical wiring fault has been identified that could lead to electric shock under certain conditions.

Departmental Managers or Workplace Health and Safety Officers should check their tea and lunch rooms and contact the Property and Facilities Work Control Centre on 52222 if any of these units are found to be installed.

Until Property and Facilities staff can check individual heaters, they should be unplugged and a warning label attached.
