Bachelor of Mathematics / Bachelor of Computer Science

1 Definitions
In these rules—

- **BCompSc major** means a major as defined in the BCompSc rules;
- **BMath major** means a major as defined in the BMath rules;
- **late year course** means a course at level 3 or higher.

2 Field of study
(1) A student may undertake the BMath component of the dual program in an approved BMath major.
(2) A student may undertake the BCompSc component of the dual program in an approved BCompSc major.

3 Program requirements
(1) To complete the program, a student must complete 64 units, comprising—
   (a) 32 units from the BMath course list, comprising—
      (i) 14 units from part A; and
      (ii) 2 units for STAT2003; and
      (iii) 12 units from part B or part C or a combination of both; and
      (iv) 4 units from the BMath course list, or part A or part B of the BSc course list; or courses approved by the associate dean (academic); and
   (b) 32 units from the BCompSc course list, comprising—
      (i) 18 units from part A, excluding MATH1051, MATH1061, MATH1071 and STAT2203; and
      (ii) 12 units for either—
          (A) 6 units from part B and 6 units from part C; or
          (B) 12 units for a BCompSc major; and
      (iii) 2 units from the BCompSc course list.
(2) In meeting rule 3(1)(a), the student must complete at least 8 units of late year courses from part A or part B or a combination of both parts of the BMath course list.
(3) Unless a different intention appears in these rules, a student must comply with the program rules for both degrees.

4 Concurrent Enrolment
A student must maintain concurrent enrolment in both constituent degree programs.

**Note**: A dual degree is a single program of study leading to the award of two degrees. A student is not permitted to graduate with one degree and continue enrolment in the program.

5 Special rules
5.1 Courses in both course lists
(1) Where a course is compulsory in one component of the dual program but not the other, then it must be counted towards the component in which it is compulsory.
(2) Where a course is compulsory in both a selected BMath major and a selected BCompSc major then it must be substituted in one major by a course at the same level or higher from the combination of parts B and C of the BMath course list and parts B and C of the BCompSc course list.
