

Important Information

It is your responsibility to ensure that you complete all the requirements for each component of this dual program in order to graduate with both degrees. The following information is designed to help you plan your enrolment to meet this goal.

The Program Requirements, available on [UQ's Programs and Courses](#) website, outline the requirements to complete the dual program.

Program Guidelines

Bachelor of Engineering (Honours) (BE(Hons)) component:

- Students without Queensland Senior Maths C or Specialist Mathematics should complete MATH1050 before MATH1051.
- Students must complete a specialisation. In addition, students may choose to complete a major or a minor.
- All common core and compulsory courses must be counted towards the BE(Hons) component of the dual program and substituted in the BSc course list by a course at the same level or higher.
- A student undertaking a specialisation and major option in the BE(Hons) component where the specialisation is Chemical Engineering, Civil Engineering or Software Engineering and who wants to undertake the Physics major in the BSc component must seek the approval of the Associate Dean (Academic).
- First Year BE(Hons) students can find further program planning information via the Faculty current student resources page:
 - Dual Degree specific information: <https://www.eait.uq.edu.au/current-students/manage-your-program/bachelor-engineering-honours/dual-degree-program-structure>
 - More general program planning information: <https://www.eait.uq.edu.au/current-students/information-new-students/get-started-engineering>
- BE(Hons) students should discuss their enrolment plan with an academic adviser. The list of academic advisers is available at: <https://www.eait.uq.edu.au/current-students/manage-your-program/academic-advice>

Bachelor of Science (BSc) component:

- Students must complete a major.
- Applied Mathematics or Mathematics Major
A student undertaking a BE(Hons) specialisation in which MATH2010 and STAT2201 are compulsory courses, and who is undertaking an Applied Mathematics major or a Mathematics major in the BSc, is required to complete MATH2100 towards the BSc component and STAT2203 towards the BE(Hons) component.
- Statistics Major
A student undertaking a Statistics major in the BSc is required to complete STAT1201 or STAT1301 towards the BE(Hons) component and is exempt from the requirement to gain credit for STAT2203, CIVL2530, or CHEE2010 towards the BE(Hons) component

A student undertaking a BE(Hons) specialisation in which MATH2010 and STAT2201 are compulsory courses, and who is undertaking a Statistics major in the BSc, is required to complete MATH2100 towards the BSc component and STAT1201 or STAT1301 towards the BE(Hons) component.

Selecting Plans in mySI-net

A plan is a prescribed combination of courses within a program being either a field of study, major, extended major, specialisation, minor or extended minor.

Ensure the plans for your program are correctly listed in [mySI-net](#). If you require assistance selecting your plan(s), follow these [instructions](#).

Cross-listed Courses

A course can only count towards one dual program component. If the course is compulsory in one program, it must be counted towards that program component and you should select another course from the other course list at the same level or higher. If a course is compulsory in both programs, you may select which program it will count towards, and select another course at the same level or higher from the other program course list, noting that the highest graded courses will count towards the BE(Hons) component and the balance towards the BSc component. For courses selected from the BSc course list, this does not include courses in the UQ minors list. Please check the special rules for the dual program as they may outline specific requirements for course substitutions.

Regardless of any possible cross-listing between programs, to meet the program requirements for the BSc component of your dual program the major must include 8 units of courses level 3 or higher taken from and counting only towards that major's course list.

Course Scheduling

This planner is intended as a guide only and is based on current scheduling of courses. Students should note that scheduling can change from year to year. You are advised to check the scheduling for the current year and contact the relevant Faculty for advice if course scheduling has changed.

Exiting Early

Students exiting early with one component of a dual degree must complete the single degree requirements of that component. Students will then be required to follow the single degree rules to complete the remaining component from that dual degree.

Global Experience

If you are planning on completing an overseas exchange, you may have to amend this plan. Students who would like an exchange experience in their program are encouraged to seek advice early in their program and be aware of the exchange deadlines: <https://employability.uq.edu.au/global-experiences>.

Require Further Assistance?

If you require assistance planning your program or have concerns about meeting program requirements, contact the relevant Faculty for advice:
