Dual Degree Study Planner
Bachelor of Mathematics /
Bachelor of Economics

THE UNIVERSITY OF QUEENSLAND AUSTRALIA | CREATE CHANGE

Important Information

It is your responsibility to ensure that you complete all the requirements for each component of this dual program in order to graduate with both degrees. The following information is designed to help you plan your enrolment to meet this goal.

Program Requirements

The Program Rules outline the requirements to complete the dual program and should be read in conjunction with the course list for each component of the dual program. The program rules are available on UQ's Programs and Courses website for the program, under 'Program Requirements', and the course lists under 'Component Degrees'.

Program Guidelines

Bachelor of Mathematics component:

- Students without Queensland Senior Maths C (or equivalent) should complete MATH1050 before MATH1051.
- Students must complete at least one major.

Bachelor of Economics component:

- Students must successfully complete all BEcon Part A courses, excluding ECON1050 and ECON1310.
- Students must successfully complete either one major from Part B and 4 units from Part C, or 20 units from Part C, with at least 8 units at level 3.

Exiting Early

Students exiting early with one component of a dual degree must complete the single degree requirements of that component. Students will then be required to follow the single degree rules to complete the remaining component from that dual degree.

Global Experience

If you are planning on completing an overseas exchange, you may have to amend this plan. Students who would like an exchange experience in their program are encouraged to seek advice early in their program and be aware of the exchange deadlines: https://employability.uq.edu.au/global-experiences.
