

Important Information

It is your responsibility to ensure that you complete all the requirements for each component of this dual program in order to graduate with both degrees. The following information is designed to help you plan your enrolment to meet this goal.

The Program Requirements, available on <u>UQ's Programs and Courses</u> website, outline the requirements to complete the dual program.

Program Guidelines

Bachelor of Biomedical Science component:

• Students without Queensland Senior Chemistry should complete CHEM1090 before taking any other chemistry course.

Bachelor of Science component:

- Students must complete at least one major or extended major.
- Students must complete at least 10 units of courses at level 3 or higher.

Cross-listed Courses

A course can only count towards one dual program component. If the course is compulsory in one program, it must be counted towards that program component and you should select another course from the other course list at the same level or higher. If a course is compulsory in both programs, you may select which program it will count towards, and select another course at the same level or higher from the other program course list. For courses selected from the BSc course list, this does not include courses in the UQ minors list.

Where a course at level 3 or higher in a major, extended major in the BSc is counted towards the other program, it must be replaced by another course at the same level or higher from the <u>major or extended major's course list</u>, and not from anywhere on the BSc course list. Similarly, courses at level 2 or high from a BSc minor must be replaced by another course at the same level or high from that <u>minor's course list</u>.

Exiting Early

Students exiting early with one component of a dual degree must complete the single degree requirements of that component. Students will then be required to follow the single degree rules to complete the remaining component from that dual degree.

Global Experience

If you are planning on completing an overseas exchange, you may have to amend this plan. Students who would like an exchange experience in their program are encouraged to seek advice early in their program and be aware of the exchange deadlines: <u>https://employability.uq.edu.au/global-experiences.</u>

Require Further Assistance?

If you require assistance planning your program or have concerns about meeting program requirements, please contact the relevant Faculty for advice:
