

Important Information

It is your responsibility to ensure that you complete all the requirements for each component of this dual program in order to graduate with both degrees. The following information is designed to help you plan your enrolment to meet this goal.

The Program Requirements, available on [UQ's Programs and Courses](https://www.uq.edu.au/programs-and-courses) website, outline the requirements to complete the dual program.

Program Guidelines

Bachelor of Computer Science component:

- Complete 32 units comprising:
 - 24 units for all BCompSc Core Courses, and
 - 2 to 4 units from Computer Science Introductory Elective Courses, and
 - 4 to 6 units from Computer Science Advanced Elective Courses
- BCompSc students should discuss their enrolment plan with an academic adviser. A list of academic advisers is available at: <https://eecs.uq.edu.au/current-students/academic-advice> and <https://www.eait.uq.edu.au/current-students/manage-your-program/academic-advice>.

Bachelor of Science component:

- Students must complete at least one major or extended major
- Students must complete at least 10 units of courses at level 3 or higher
- Student must not complete the Computer Science minor, major or extended major in the BSc component of the dual program.

Selecting Plans in mySI-net

A plan is a prescribed combination of courses within a program being either a field of study, major, extended major, specialisation, minor or extended minor.

Ensure the plans for your program are correctly listed in [mySI-net](#). If you require assistance selecting your plan(s), follow these [instructions](#).

Cross-listed Courses

A course can only count towards one dual program component. If the course is compulsory in one program, it must be counted towards that program component and you should select another course from the other course list at the same level or higher. If a course is compulsory in both program's plans, you may select which program it will count towards, and follow the special rules that outline how to select another course at the same level or higher. For courses selected from the BSc course list, this does not include courses in the UQ minors list.

Regardless of any possible cross-listing between programs, to meet the program requirements for the BSc component of your dual program, each:

- major must include 8 units of courses level 3 or higher,
- extended major must contain 12 units of courses at level 3 or higher, and
- minor must contain 4 units of courses at level 2 or higher

taken from and counting only towards that plan's course list.

Course Scheduling

This planner is intended as a guide only and is based on current scheduling of courses. Students should note that scheduling can change from year to year. You are advised to check the scheduling for the current year and contact the relevant Faculty for advice if course scheduling has changed.

Exiting Early

Students exiting early with one component of a dual degree must complete the single degree requirements of that component. Students will then be required to follow the single degree rules to complete the remaining component from that dual degree.

Global Experience

If you are planning on completing an overseas exchange, you may have to amend this plan. Students who would like an exchange experience in their program are encouraged to seek advice early in their program and be aware of the exchange deadlines: <https://employability.uq.edu.au/global-experiences>.

Require Further Assistance?

If you require assistance planning your program or have concerns about meeting program requirements, please contact the relevant Faculty for advice:
